**Care should be observed when disposing of the battery to avoid shorting it!**

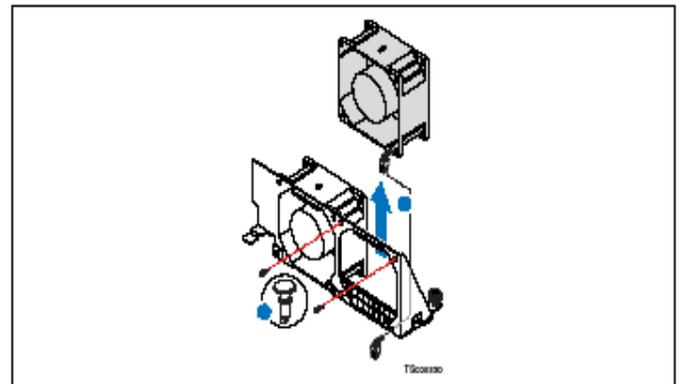

12. Removal of the CPU fan Assembly requires a #2 Phillips screwdriver.

- a. Unplug the CPU fan assembly power cables from the front panel board. (“A”)
- b. Loosen the blue thumbscrew fastener on the CPU fan assembly bracket. (“B”) with a #2 Phillips screwdriver.
- c. Lift the fan assembly out of the chassis.

12. Removal of the Fans from the CPU Fan Assembly does not require any tools.

- d. Remove the rivets connecting the fans to the bracket. (“A”)
- e. Loosen the blue thumbscrew fastener on the CPU fan assembly bracket (“B”).
- f. Lift the fan assembly out of the chassis.
- g. Discard the Fans, CPU Fan Assembly, and rivets in the appropriate recycle bin.**

19. Removal of the RMM and/or GCM3 Module does not require any tools.
- Pull the module(s) straight up from the motherboard, until it disengages the standoffs and connector.
  - Discard the RMM and/or GCM3 Module in the appropriate recycling bin.**

20. Removal of the Intel Value Solid State Drive (VSSD), if present, requires a #? Screwdriver.
- Remove the screw holding the VSSD to the Interposer board ("E").
  - Lift the VSSD off the Interposer board.

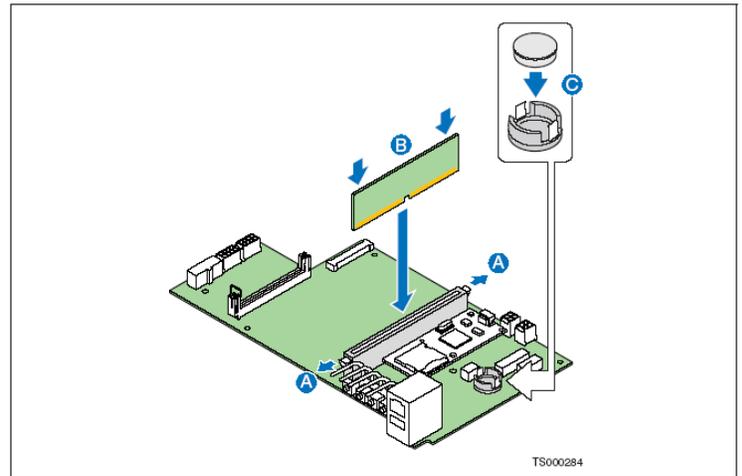

- 20.
- Detach the cable connecting the Interposer board to the motherboard.
  - Remove the two screws securing the Interposer board. ("B")
  - Lift the Interposer board straight off the motherboard to complete the removal.
  - Discard the Intel VSSD, Interposer Board, cable, and screws in the appropriate recycling bin.**

21. Removal of the RAID DIMM and RAID Key (if installed) does not require any tools.
- Press down on the two latches on either side of the RAID DIMM. (“B”)
  - Lift the RAID DIMM out of the connector. (“A”)
  - Remove the RAID Key from it’s socket. (“C”)
  - Discard the RAID DIMM and the RAID Key in the appropriate recycling bin.**

22. Removal of the RAID Intelligent Battery Backup Unit (IBBU) requires a #2 Phillips screwdriver.
- Disconnect the cable from the IBBU to the connector on the SFP board. (“C”)
  - Slide the IBBU toward the front panel to unlock it. (“B”) Remove from the chassis.

22. c. Open the battery assembly case, and disconnect the battery cable. (“B”)
- d. Unplug the battery power cable from the battery assembly case, and remove the battery pack. (“B”)
- e. **Discard the battery pack, the battery cable, and the battery assembly case in the appropriate recycling bin.**

23. Removal of the Cable Management Bracket requires a #2 Phillips screwdriver.

- a. Remove the cable management bracket ("B") by loosening the blue thumbscrew ("A") that fastens it to the drive bay subassembly and pull the bracket out from the chassis ("C").
- b. **Discard the bracket in the appropriate recycling bin.**

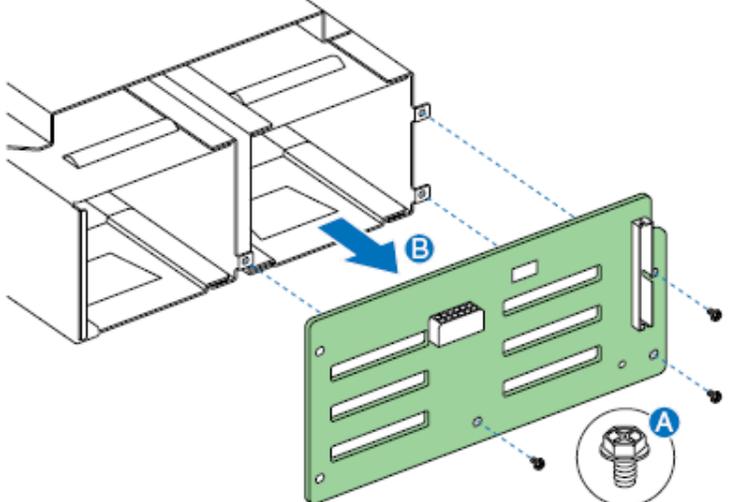

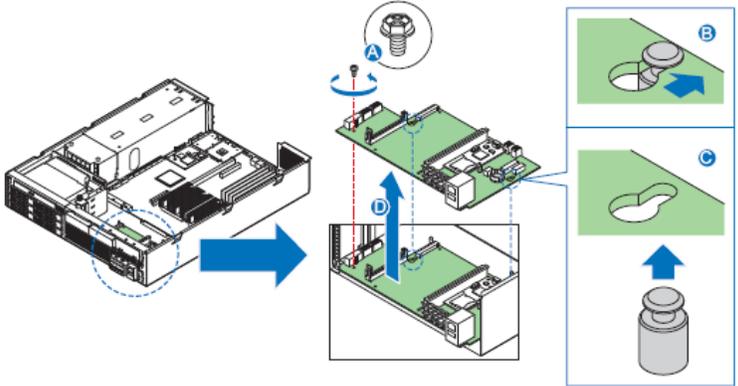

24. Removal of the Drive Bay Assembly requires a #2 Phillips screwdriver.

- a. Remove the three (3) screws that attach the drive bay front panel to the side of the chassis ("A").
- b. Remove the two (2) screws on the right side of the drive bay front panel (B).
- c. Pull the drive bay half-way out of the chassis ("C").
- d. Disconnect power cable from SFP board and IDE cable from server board.
- e. Pull the drive bay completely out of the chassis.

26.

Removal of the motherboard requires a #2 Phillips screwdriver.

Note: Disconnect cable harness's from Power Distribution Board, ensure that all other cables and connectors to the motherboard have been removed.

- Remove the six (6) screws from the motherboard ("A").
- Remove the motherboard by sliding it towards the front of the unit to disengage it from the rear panel then lift motherboard out ("B").
- Discard the Motherboard and screws in the appropriate recycling bin.**

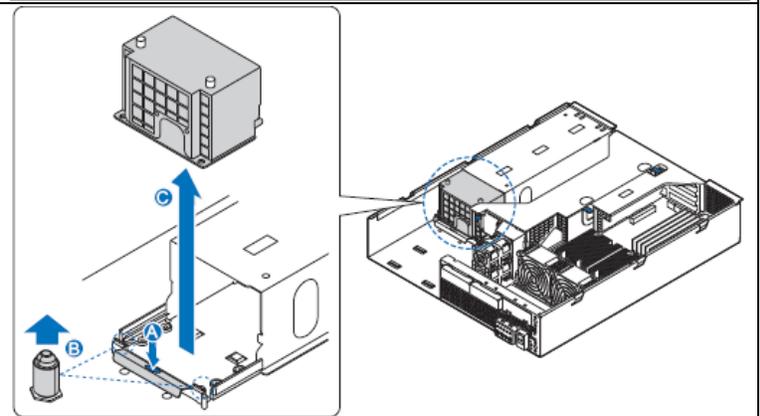

TS000309

27

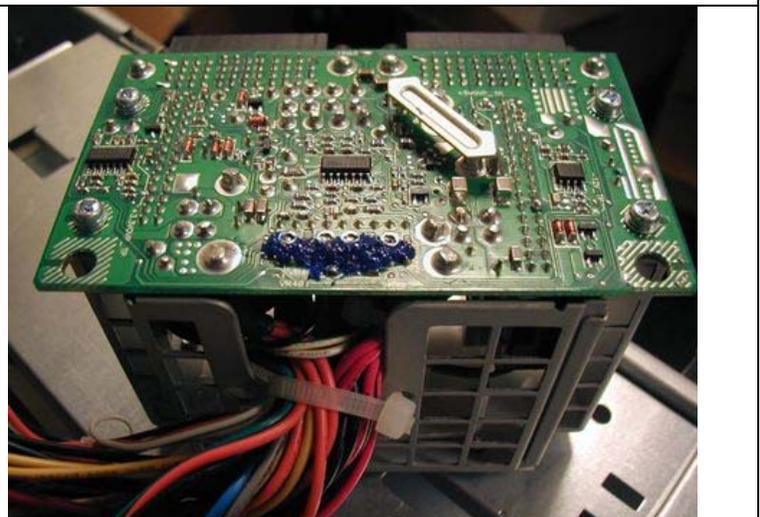

Removal of the Power Distribution Board requires a #2 Phillips screwdriver.

- To free the PDB assembly use your thumb press down the metal clip at the base of PDB assembly ("A").
- Lift the PDB assembly up and out of chassis ("B").

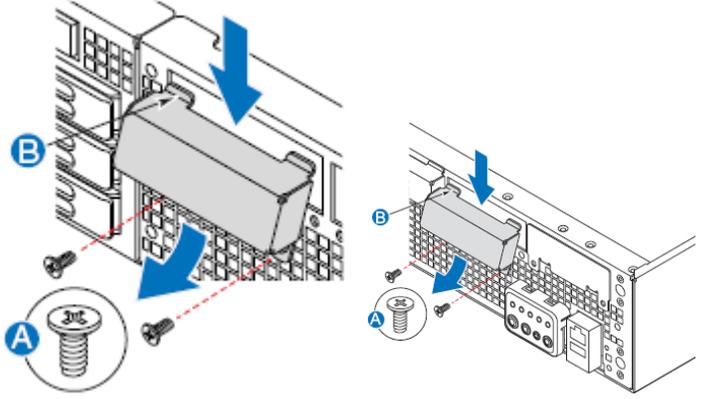

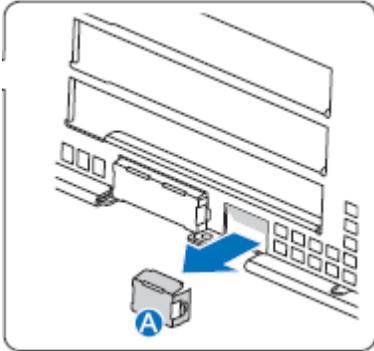

27

- Remove the four (4) screws that attach the PDB to the assembly.
- Discard the PDB, assembly housing, tie-wrap, and screws in the appropriate recycling bin.**

<b>Recycling/Material Code</b>	<b>Important Information</b>
<b>Material /Components, which must be removed and treated separately</b>	
Lithium Battery	Battery free of hazardous substances, installed in socket on the motherboard
Printed circuit boards	Motherboard, DIMMs, Gigabit card, PCI riser boards, Power Supply, CD-ROM adapter board, & LED Board
Disk Drives	Mounted on disk carrier
<b>Material /Components, which can disturb certain recycling processes</b>	
Copper	Fan sink
<b>Material /Components, through which benefits can normally be achieved</b>	
Cold Rolled Steel	Access cover, chassis bottom, CD-ROM and Hard Drive bracket, fan tray, & Card Cage
* ABS	Shroud
Cables	Distributed in device
Fans	Fan tray
<b>Special notes</b>	
* Flame retardant of plastics <b>does not</b> contain PBB and PBDE.

### Annex A

Producer:	<Company name, other on addressing the producer>
Scope of information sheet:	< Product category as in Annex IA of WEEE Directive, or type of equipment as in Annex 1B of WEEE Directive, or producer's Product Family, or single products identified by brand and model name >

Component or Material	Remarks / Location
Battery (internal *) containing Mercury (Hg)/ NiCad/Lithium/ Other	<b>Lithium battery ↓</b> <b>Located on the motherboard</b>
Backlighting lamps of LCD/TFT or similar screens containing Mercury (Hg)	<b>NONE</b>
Mercury (Hg) in other applications**	<b>NONE</b>
Cadmium**	<b>NONE</b>
Gas discharge lamps	<b>NONE</b>
Plastic containing ruminated flame retardants other than in Printed Circuit Assemblies ***	<b>NONE</b>
Liquid Crystal Displays with a surface greater than 100 cm <sup>2</sup>	<b>NONE</b>
Capacitors with PCB's	<b>NONE</b>
Capacitors with substances of concern**** + height > 25 mm, diameter > 25 mm or proportionately similar volume	<b>NONE</b>
Asbestos	<b>NONE</b>
Refractory ceramic fibres	<b>NONE</b>
Radio-active substances	<b>NONE</b>
Beryllium Oxide	<b>NONE</b>
Other forms of Beryllium	<b>BE-CU in some connector ↓</b> <b>contacts</b>
Gasses - which fall under Regulation (EC) 2037/2000 and all hydrocarbons (HC).	<b>NONE</b>
Components with pressurised gas which need special attention (Pressure > 1,5 bar) *****	<b>NONE</b>
Liquids ***** if volume > 10 cl (or equivalence in weight, e.g. for PCB, oil...)	<b>NONE</b>
Mechanical components that store mechanical energy (i.e. springs) or equivalent parts which need special attention ***** (diameter > 10 mm and height > 25 mm or proportionally similar volume and expanding)	<b>NONE</b>
PBDE (deca- & octa-BDE) and Perfluorocatane sulfantes (PFOS) in Directive 2006/122/EC	<b>NONE</b>

↓ = Arrow indicates the need for the location of the compartment/ substances within the product. When the location of a substance/ components is requested, it is at part level, e.g. main board, housing etc

\* Internal means that batteries can only be removed by opening the product by means of (a) tool(s).

\*\* Substances are considered to be in the product if present above the levels specified in Commission Decision 2005/618/EC related to Directive 2002/95 (EC) (RoHS Directive) or if their use is permitted through exemptions in the Annex of Directive 2002/95(EC)

\*\*\* To be coherent with industry current standards and practices on tracking of plastic parts, Directive 2002/96 (EC) Annex II requirement is understood to focus on plastic parts that weight more than 25 g.

\*\*\*\* Substance of concern other than PCB, to be specified/ addressed further in the context of Directive 2002/96 (EC) Annex II national requirements and European developments

\*\*\*\*\* Needs of equivalent nature as those for maintenance, service manuals and installation for safety purposes.
